TIP 1 HIRE A BAND A great live band creates a party atmosphere that a DJ alone can't. A band has many members with many personalities interacting with guests on the dance floor, creating hype and a party atmosphere. The benefit of having a DJ is that they can play songs a band doesn't know. That's why it's good to have both. That's why all our band packages also come with a DJ.

TIP 2 SHOULD YOU HIRE A MC Professional MCs do a great job of keeping everything on schedule, but having a friend handle the MC duties can be even better. Weddings should be fun, not stiff and formal. When guests see a familiar face running the show, it helps everyone relax and enjoy the celebration.

TIP 3 RELY ON YOUR SUPPLIERS On the day of your Wedding there is so much happening around you it may feel like a Blur. That's why it's important to book good quality suppliers that are experienced & specialise in Weddings. A photographer, videographer, band, caterer, stylist etc with Wedding experience understands what it takes to create a successful Wedding. Ask for advice, ask for their opinions, bounce ideas back and forth and use their experience to make your decisions.

TIP 4 DON'T GET OVERWHELMED I totally understand that you've been dreaming about your wedding day since you were 10, and you want it to be absolutely perfect. Just a friendly reminder that it's meant to be fun! If you start feeling stressed, take a breather and remember to enjoy the process. You could also consider sharing some of the responsibilities with your family or friends, and don't forget to involve your partner in the planning too!

TIP 5 PERFECTING A RUNSHEET We've learned that it's best to keep speeches short and spread them out. Make sure all the formal parts and food are done before the dancing starts to keep everyone on the dancefloor. Finally, end the night with a farewell tunnel or circle.
